and REIN, Brussels

Dear friends of the COMPUTERIA!

This is the FIRST newsletter AFTER the end of the financial support of the European Commission for the project COMPUTERIA.

The project is over, but the idea still lives. And this shows that sustainability is no idea, it's reality! Let's have a short view on the first steps in Bad Muskau, a little town in East Germany!

A short notice on <http://www.buerger-badmuskau.de/>

Computer Club Forum

All participants in the Computer Club forum are cordially invited to our project "Citizens get acquainted with computers and the internet". Our concerns: deprive them of their shyness, individually and quickly.

We want to convey especially older people and people with disabilities with knowledge and skills in a practical way.

Interested citizens contact us by e-mail to: buerger-badmuskau@online.de

We appreciate your interest and participation. We meet every 1st and 3rd Thursday of the month by 17 clock and at other times individually with participants.

To carry out our project we engage professionals who tell us something about Internet, copyright protection (regarding the "Downloads" from the Internet), Internet research, photo editing, PowerPoint presentations, working with our citizens' platform.

Other topics we take on you.

Planned: 20 January 2011, 17 clock lecture: "All about online banking" (Gabriele Gravina)

The project is sponsored by Action Man, funding: www.dieGesellschafter.de from September 2010 to May 2011.

Our project partner is the VSBI eV (Association for social and professional integration: www.vsbi.eu) to help us with premises, technology and expertise in the personal support of his club chairman Roger Schmidchen with the experiences from the COMPUTERIA project, conducted with several EU countries: Thus we can also use an e-learning platform (which has been developed during this project funded by the European Commission under the programme of Life-Long-Learning, comment by the editor of this newsletter).

This first transfer outside of project finance shows that begin the ideas and experiences of Computeria to live and continue to develop. This fills us with great satisfaction.

The first impressions during the preparation of the up-coming event in January 2011
